

FREE TEMPLATE · STEP 2 OF YOUR ONBOARDING

Proposal Template

A ready-to-fill scaffold for a compliant proposal response. Copy this structure into your own document and build directly against the solicitation's own section numbering — evaluators score against a checklist, so make that checklist easy to find.

Cover Letter

Date, solicitation number, your legal business name, UEI, CAGE code, point of contact, and a one-sentence statement that you're submitting a complete, compliant response.

Technical / Management Approach

Address every task in the PWS/SOW/SOO in the same order it's presented. State what you'll do, how, and with what staffing — avoid restating the requirement without adding your actual approach.

Past Performance

List 2-3 relevant contracts: customer name, contract number/description, dollar value, period of performance, and a current point of contact. New entities: substitute comparable private-sector work.

Staffing Plan

Key personnel, their relevant qualifications, and how many FTEs you're committing to this contract specifically.

Pricing Proposal

Your priced CLIN breakdown, built from real direct + indirect costs plus a deliberate margin — not a number picked because it 'feels competitive.'

Certifications & Representations

Attach or reference your current Reps & Certs and any set-aside certification documentation you're claiming.

Capabilities Statement

Attach your one-page capabilities statement as a supporting exhibit.

Before you submit: run this draft against the Proposal Assembly Checklist (free download, Step 3) to confirm nothing required is missing.

This guide is free, no strings attached. FASS FILL inside the app will generate a compliance matrix and outline like this automatically from a pasted solicitation. Questions: admin@fass.systems · flow.fass.systems
